EXPERIENCE

Fondazione Bruno Kessler

Trento, Italy, Jan 2025 - Aug 2026

Worked at the Data Science for Industry and Physics (DSIP) unit. Developed deep learning solutions for industrial applications.

SONY Europe - Master Thesis Intern

Stuttgart, Germany, Mar 2024 - Sep 2024

Intern at the SONY Stuttgart Laboratory 1, focusing on neural radiance fields (NeRFs). Implemented sparse-view 3D reconstruction pipeline by leveraging Latent Diffusion Models.

EDUCATION

Università Bocconi, PhD in Computer Science

Sep 2026 - Today

Currently attending the first year PhD courses.

Università degli Studi di Padova

Nov 2022 - Oct 2024

MSc Physics of Data

Final grade: 110 with honors / 110

Courses on statistical physics, machine learning and computer vision.

Final thesis: *Leveraging generative models for the optimization of 3D implicit representations*, carried out at Sony Stuttgart Laboratory 1.

University tutor (120 hours) for Calculus 1 (Engineering Dept.) and Calculus 3 (Physics Dept.)

Università degli Studi di Padova

Oct 2019 - Sept 2022

BSc Physics

Final grade: 110 with honors / 110

Final thesis: *General statistical laws in many-component systems*, carried under the supervision of Prof. S. Azaele and Dr. E. Pigani of the LIPh Lab at the University of Padua.

TECHNICAL SKILLS

- **Python:** Extensive use of PyTorch to design and train deep neural networks. Working experience with `pandas`, `polars`, `scikit-learn`, `PySpark`, `FastAPI`, `Dash`.
- **R:** Experience working with `tidyverse` packages for data analysis.
- Working experience with `bash`, `slurm`, `git`, `docker`, `uv`, `conda`.

PUBLICATIONS

- R. Tancredi, A. Feltrin, G. S. Infirri, S. Toso, L. Vollmar, T. Hugel, M. Baiesi, *Constrained hidden Markov models reveal further Hsp90 protein states*, 2024 New J. Phys. 26 073023.

LANGUAGES

Italian (mother tongue), English C1 (Cambridge CAE obtained in 2018), German C1 (Göthe Zertifikat obtained in 2019)
